A DIFFERENT KIND OF TEAM BUILDING

The best team experiences never happen around a conference table. Studio Lucerne creates hands-on creative workshops where colleagues can step away from emails, meetings and screens - and spend time making, experimenting and connecting in a completely different way.

WHEN TIME TOGETHER MATTERS MORE THAN EVER

With teams working remotely and colleagues often spread across different locations, quality time together has become more valuable than ever.

Our creative team-building experiences bring people away from screens and into the same space - to connect, communicate, laugh, experiment and create something together.

WHY IT WORKS

Build team chemistry

Creative activities create natural opportunities for conversation, collaboration and connection - helping people interact beyond their usual roles.

Find a different balance

A change of pace can shift the energy of a team. Stepping away from the intensity of work creates space to slow down and gain a fresh perspective.

Practice real-life skills

Workshops encourage problem-solving, patience, communication, adaptability, confidence and the ability to experiment without needing perfection.

Get away from the screen

Modern working life is increasingly digital. Using your hands and working with physical materials offers a refreshing counterbalance to hours spent behind a screen.

Create together

A creative workshop gives people the chance to discover new strengths, support one another and enjoy the simple satisfaction of making something together.

THE RESULT

A team that has shared something genuinely different - and memories that last beyond the workshop.

THE EXPERIENCE

Made for your team.

A creative experience, tailored for you.
No two teams are the same - so neither are our workshops. Studio Lucerne can create a hands-on creative experience around your team and the kind of day you want to create.

CHOOSE YOUR SETTING

The Lili Centre, Lucerne or at your location.
Our workshops can take place at the LiLi Centre, a welcoming community space in Lucerne. Already have a suitable meeting room, studio or event space? We can come to your workplace or chosen location and transform your space into a creative workshop for the day.

WHAT COULD YOUR TEAM CREATE?

Workshops can be adapted around different creative techniques and interests - from drawing and painting to tactile, hands-on making and other creative projects. The focus isn't on artistic ability. It's on trying something new, getting involved and creating together.

IDEAL FOR

- Team-building days
- Company retreats & off-sites
- Department away-days
- Onboarding & new team introductions
- Leadership & management days
- Christmas & seasonal events
- Client or partner experiences
- A creative break at a conference or event

Workshops can be tailored to your group, timing and location. Costs are available upon request.

A SAMPLE OF THEMES

ONE TEAM. ONE ARTWORK.

The group creates one large collaborative artwork, with each person responsible for a section - but the sections only make sense when assembled together.

Team-building theme:
Collaboration, interdependence, communication.

Outcome:
The artwork incorporates the company's values, colours, mission or visual identity.

BLIND COLLABORATION

People work in pairs or small groups without initially seeing what the others are doing. They have to respond to marks, shapes or instructions rather than controlling the final result.

Team-building theme:
Trust, adaptability, letting go of control.

Outcome:
Connect the exercise to a company's transformation/change theme.

ART WITHOUT WORDS

Teams are given a challenge that they can only communicate visually. e.g. "Create an artwork that represents what excellent teamwork looks like". But nobody can speak for the first 15 minutes. They have to communicate through marks, symbols, gestures and visual decisions. Then remove the restriction and let them discuss what happened.

Team-building theme:
Communication and non-verbal communication.

Outcome:
Multiple rounds exploring different communication styles. This is particularly good for international/multilingual teams.

THE COMPANY AS A LANDSCAPE

The team creates a large landscape representing their organisation. Everyone creates one part of the landscape. Different elements represent different aspects of the company e.g. Mountains = challenges, Rivers = communication, Bridges = collaboration, Trees = growth etc....

Team-building theme:
Shared vision and organisational culture.

Outcome:
Turning ideas into a large visual "company landscape". Strong corporate-sales angle by tying the activity directly to strategy and culture.

(More themes available upon request)

CREATE.
CONNECT.
